Section A (Reading 10M)

A.01. Read the given passage carefully and answer the questions that follows.

The blue whale is the largest living animal to have ever lived on the planet Earth. Blue whales are very larger than the largest dinosaur that ever lived. The largest blue whales can grow as large as 100 feet long, which is longer than three school buses put together!

Even though blue whales are huge, they eat tiny creatures known as krills. Krills are tiny shrimps- like animals. The whale simply opens its mouth, fills it with krill and salt water and filters the water out of plates in its mouth called baleen. The blue whale may eat over 8000 pounds of Krills in a single day!
